Promotional Strategy Impacts on Organizational Market Share and Profitability

Course Introduction

Promotion is considered one of the most effective tools to attract customers towards the products or services. Being one of the four key aspects of the marketing mix promotion ensures that the customers are aware of the product or service that you are offering. Higher the level of competition the producers are keen on building more attractive strategies than that of competitors. Firms have a variety of alternative information delivery systems available to them, which can be used to construct an appropriate promotional mix strategy. This portfolio of the alternative delivery mechanisms includes majorly; advertising, personal selling, public relations, publicity, direct marketing, and sales promotions.

Impact on organizational market

In this 5- day course, we will be discussing in detail the various promotional strategies and their impact on organizational market share and profitability. A Promotion strategy can be considered as a process whereby information about the organization's products or services is encoded into a promotional message for delivery to the customer.
