

Information Technology

CompTIA Server+

Course Introduction

This CompTIA Server+ is a foundation-level certificate for IT professionals with 18-24 months of experience, and whose main function is focused on PC support. This course focuses on server hardware technologies and operating systems plus related storage and network systems and support procedures. This course is designed to provide participants with the fundamental concepts of server set-up, networking, applications, maintenance and security.

Target Audience

This training course will benefit IT professionals with (or seeking) job roles such as Server Support Technician, Server Administrator, Application Server Administrator, and Storage Administrator.

Learning Objectives

- Install and upgrade server-class hardware.
- Install and configure server NOS and applications software.
- Configure RAID arrays.
- Use management and monitoring tools.
- Create disaster recovery plans.
- Troubleshoot hardware, storage, networking, and software issues.

Course Outline

- **Day 01**

Server Setup

- Servers and Racks
- Storage Devices
- RAID
- System Setup
- Server Operating Systems
- Troubleshooting Procedures

- **Day 02**

Server Networking

- Ethernet
- Internet Protocol
- Routers and Firewalls
- Network Services
- Virtualization Services

- **Day 03**

Server Applications

- Configuring Server Roles
- Storage Services
- Volume Management
- Directory Services
- File and Print Services
- Performance Monitoring

- **Day 04**

Server Maintenance

- Server Hardware
- Environment and Maintenance
- Power Distribution
- Server Hardware Troubleshooting
- Server Management
- Configuration Management

• **Day 05**

Server Security

- Site Security
- Remote Access Services
- Server Hardening
- Security Software
- Disaster Recovery
- Backup
