

Maintenance & Reliability Management

# Preventive Maintenance & Service Processing

## Course Introduction

---

This training course is designed to provide participants with the relevant processes and functions of preventive maintenance and service. This course focuses on the creation and scheduling time-based and performance-based maintenance plans and is based on software release: SAP ERP 6.0 Enhancement Package 8.

## Target Audience

---

The training course is designed to be interactive and participatory, and includes various learning tools to enable the participants to operate effectively and efficiently in a multifunctional environment. The course will use lectures and presentations, exercises, experiential and exposure to real world problems and policy choices confronting delegates.

## Learning Objectives

---

- Gain a comprehensive understanding of the processes and functions of preventive maintenance and service.
- Identify the methods and systems involved in single cycle maintenance plan, strategy maintenance plan and multiple counter plan.
- Know the special functions for task lists.
