

Oil, Gas and Chemical

ESG Reporting

Course Introduction

ESG (Environmental, Social and Governance) is one of the biggest challenges in today's business world. Companies realise that their environmental and social impact is crucial to their long-term sustainability and competitiveness. This training program is designed to provide participants with a comprehensive exploration of Environmental, Social, and Governance (ESG) principles and reporting frameworks.

ESG concepts

This training course is composed of four practical modules and it is suitable for those who need to understand or cooperate on ESG strategy and reporting in any role (legal & compliance, finance, HR, investor relations, procurement, logistics, environment, sales, marketing etc.). Participants will gain a thorough understanding of ESG concepts, regulatory requirements, and effective report preparation techniques. This course equips professionals with the essential knowledge and skills to navigate ESG reporting requirements and contribute to sustainable business practices effectively

Training Course Methodology

This course is designed to be interactive and participatory, and includes various learning tools to enable the participants to function effectively and efficiently. The course will use sessions, exercises, and case applications, and presentation about proven-by-practice methods, new insights and ideas about emotional intelligence and its effects in a corporate world

Target Audience

- Process design
- Unit Operator
- Environmental
- Process safety engineer
- Gasoline blender engineer
- Lab supervisor
- Supply chain engineer
- Distillates analyst
- Models engineer

- Chemical Operator
- Chemical Plant Operator
- Chemical Process Technician
- Control Room Supervisor
- Gas Plant Process Operator
- Gas Production Operator
- Gas Terminal Operations and Storage
- Gathering Pipeline engineer
- Oil Terminal / Storage engineer
- Pipeline Maintenance / Equipment / Compliance / Repair
- Pipeline Testing / Technician / Supervisor / Safety
- Plant Equipment Operator
- Plant Operations Technician
- Plant Shutdown
- Plant Supervisor
- Power Distribution
- Power Plant Manager
- Process Supervisor
- Refinery Operations Technician / Manager
- Terminal Operator / Manager
- Utilities Operator

Learning Objectives

- Gain a comprehensive understanding of ESG (Environmental, Social, Governance) principles, including its significance, benefits, and practical implications across various industries.
- Acquire knowledge of regulations and voluntary frameworks governing ESG reporting, distinguishing between mandatory and voluntary disclosure requirements such as CSRD, EFRAG, ISSB, GRI, SASB, and TCFD.
- Learn the essentials of ESG report preparation, including topic selection, scope definition, and adherence to reporting principles to ensure quality and transparency.
- Develop practical skills in the ESG report preparation process, including team composition, phases, and steps, as well as strategies for anticipating and mitigating common challenges and pitfalls.

Course Outline

- **01 Day One**

- ESG at a Glance**

- What does ESG mean
 - why it is important and what are the benefits
 - Practical illustrations from various industries
