Administration and Office Efficiency

Documents and Records Management Compliance

Course Introduction

Document and records management is essential for organizations as it ensures compliance with regulations, facilitates easy retrieval of information, preserves valuable knowledge, promotes accountability and transparency, mitigates risks, enhances efficiency and productivity, safeguards sensitive data, enables collaboration, and improves overall organizational effectiveness.

This training course is designed to provide participants with the essential strategies, tools, and technologies used to capture, categorize, manage, store, preserve (archive), and deliver documents and records in support of business processes. It also covers the key components of ISO 15489, enabling organizations to comply with best practices.

Training Course Methodology

The training course is designed to be interactive and participatory, and includes various learning tools to enable the participants to operate effectively and efficiently in a multifunctional environment. The course will use lectures and presentations, exercises, experiential and exposure to real world problems and policy choices confronting delegates.

Target Audience

- Office managers.
- Executive secretaries.
- Administrators and assistants.

Learning Objectives

- Gain an understanding of the document and records management lifecycle.
- Familiarize oneself with the ISO 15489 records management standard.
- Explore the process of implementing a records management system based on ISO 15489.
- Assist in creating a business case and requirements for selecting and procuring document and records management solutions.
- Develop a document and records management plan of action for implementation in your organization, drawing insights from best practice implementations and case studies.
- Master the concepts related to managing information and content, including workflow, business processes, and collaboration.
- Establish search and retrieval capabilities for the documents and records management.
- Effectively set up access controls and security measures.
