

Civil Engineering

**Certified Facility Manager (CFM)**

# Course Introduction

---

## Certified Facility Manager (CFM)

Facilities management is a critical function that ensures the efficiency, safety, and sustainability of built environments. The Certified Facility Manager – CPD UK Accredited program is designed to provide facility managers with advanced knowledge, best practices, and strategic skills required to manage complex facilities and optimize operational performance.

**This BOOST course** covers facility planning, operations, sustainability, financial management, and risk mitigation while integrating modern technologies and compliance requirements. Participants will gain hands-on experience and real-world insights through case studies, interactive discussions, and practical applications.

Upon successful completion, participants will receive an internationally recognized certification from CPD UK, enhancing their professional credibility and career prospects in the field of facilities management.

## Target Audience

---

- Facility Managers & Directors
- Operations & Maintenance Managers
- Real Estate & Property Managers
- Health, Safety & Environment (HSE) Professionals
- Corporate Services & Administration Managers
- Anyone looking to advance their career in facilities management

## Learning Objectives

---

- Understand facility management principles and global best practices.

- Develop strategic facility plans aligned with organizational goals.
- Enhance operational efficiency and sustainability in facility management.
- Apply financial planning and budgeting for facilities operations.
- Implement risk management strategies and ensure compliance with regulations.
- Utilize modern technologies and digital tools in facility management.
