

Project & Contract Management

Project Management Office

Course Introduction

The Project Management Office (PMO) Training Course offered by BOOST is designed to equip professionals with the essential skills and knowledge to establish, manage, and lead a high-performing PMO within their organizations.

As businesses become more complex and projects play an increasingly vital role in achieving organizational success, adopting a structured approach to project management is critical. A well-functioning PMO not only streamlines project execution but also ensures alignment with the organization's strategic objectives. This training course is tailored to meet the needs of professionals involved in project management at various levels, including Project Managers, PMO Directors, Business Analysts, and Senior Executives.

Throughout the course, participants will explore the core functions and structures of a PMO, various project management methodologies, and how to align projects with broader business strategies. The program also covers key areas such as stakeholder management, governance, risk management, and the implementation of effective tools and techniques for PMO success.

The training includes interactive workshops and group discussions, ensuring a dynamic and engaging learning experience. These sessions not only provide theoretical insights but also offer practical solutions to real-world PMO challenges.

Target Audience

- Project Managers
- Program Managers
- Portfolio Managers
- PMO Directors/Heads
- Strategy Planners
- Business Analysts
- Change Managers
- Operations Managers
- Senior Executives (such as CIOs, COOs, VPs)
