

Quality Management & Operational Excellence

ISO 14001-2015 Lead Implementation

Course Introduction

ISO 14001 – Environmental Management Systems, the world’s first international environmental standard, is used by thousands of organizations to improve their environmental, sustainability and operational performance. It provides a framework to help you identify and control how your activities, products and services affect and impact the environment. It helps put robust procedures in place to conserve your resources and save money.

Implementing ISO 14001:2015 allows an organization to reduce environmental impacts and increase operating efficiency. This can help you cut waste, prevent pollution and save resources.

Target Audience

This BOOST training course is designed and beneficial for professionals involved in the planning, implementing, maintaining, supervising or auditing of an ISO 14001:2015 EMS.

Learning Objectives

- Identify key benefits of implementing an effective EMS
- Develop a plan and determine resources required
- Apply good practice using proven tools and techniques
- Implement a system that considers socio-economic needs and environmental conditions
- Provide products and services that consistently meet customer and regulatory environmental requirements.
- The common framework of the ISO management system standards, including the High-Level Structure, common text, and common terminology.
- How to apply the Process Approach to identify the organization's core and support processes.
- The necessary steps to implement a brand-new Environmental Management System.
